OLIVER
Confidence. Sealed Daily.™

DROP THE LABELS. **SAVE THE LABOR.**

CUSTOMER PROFILE
Guernsey County Senior Citizens Center prepares approximately 600 home-delivered meals per day, five days a week.

THE CHALLENGE
Two paper labels per meal required printing, transport and manual application, slowing production and requiring additional help from supervisors and other office staff to complete the meals.

THE OLIVER SOLUTION
Oliver MX-1908 Sealer with Inline Film Printer prints meal information directly onto the film, removing the manual label workflow from the operation.

RESULTS
Packaging speed increased from 5–6 to 13–15 meals per minute—roughly 2.5× the previous rate, without adding staff. Reported meal production time dropped over 60% from roughly two hours to 30–45 minutes.

AFTER

WHAT THE TEAM REPORTED

- Faster packaging without production interruptions or slowdowns.
- More consistent print placement and readable meal details.
- Highly familiar process with easy-to-learn software.
- Less stress and happier production and delivery teams

"We would recommend this to any foodservice organization. Don't wait!"

- *Betsy Mathers, Nutrition Department Manager*
